Coconut, dried, 15 g	3 (1-5)
Cocoa powder, 5 g	6 (3-9)

Legend

Less than 1 µg nickel per serving	
Less than 10 µg nickel per serving	
Less than 20 µg nickel per serving	
More than 30 µg nickel per serving	

- For adults, a reasonable target is 15 points per day.
- Foods are ordered from lowest to highest average nickel score.
- A * means there are very few measurements, so it's unreliable.
- Minimum and maximum scores are shown in brackets beside the average score. If the range is large, be suspicious.
- Avoid stainless steel utensils and equipment except 18/0. Line metal pans with parchment paper.
- Pay attention to serving sizes! We recommend using a kitchen scale until you get used to serving sizes. For reference, 1 gram is approximately 1 mL of a liquid, so for liquids:

5 g ~	5 mL ~	1 tsp
15 g ~	15 mL ~	1 tbsps
30 g ~	30 mL ~	1 fl oz
60 g ~	60 mL ~	1/4 cup
125 g ~	125 mL ~	1/2 cup
- "Prepared" meats, fish and vegetables are separated from raw because cooking affects nickel content. If someone else is doing the cooking, use the "prepared" score. If you are preparing the food with low nickel equipment, use the regular score.
- Follow all appropriate hygiene and food preparation standards.

To explore the data, change serving sizes and log your nickel intake, try the Nickel Navigator app, available on iOS and Android.

NOTE: This diet is intended for individuals with a diagnosed nickel allergy. If you have not been tested, please do so before starting this diet. Consult a health care professional to ensure that your long-term dietary needs are being met.
